

### **MISSIONS**

Maximize the combat readiness of operational forces within the Pacific region by providing specialized environmental and preventive medicine support.

### **VISIONS**

To play a major role in advancing the global readiness of operational forces by providing the most effective preventive health services possible.

### **GOALS**

- (1) Maximize readiness through disease and environmental surveillance and intervention.
- (2) Establish and maintain a rapidly deployable capability (FDL/FD-PMU/MMART) for threat assessment, force health protection/surveillance, and humanitarian assistance/disaster relief missions.
- (3) Assist shore and afloat medical departments in making managerial and clinical decisions that have the greatest impact on the health of Navy personnel through application of sound epidemiological techniques.
- (4) Reduce the number of behavioral risk factors of Navy and Marine Corps personnel.
